MOTomed letto

7 Safe and easy from bed to bed

The spring-supported height adjustment and the individually adjustable bed fixation clamp allow easy positioning and fixation of the MOTomed letto to the bed. The patient can stay in bed during positioning of the device.

The chassis width is adjustable from 43 to 73 cm/17.2 to 29.2 inches. You can drive the castors to the right or to the left side of the bedstead depending on the width or substructure of the bed.
